MBA_BA I SEMESTER MANAGEMENT CONCEPTS & OB COURSE CODE: MBA_BA -101	Max. Marks: 100 Min. Marks: 35 External : 60 Internal : 40
----------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------

Credits: 4

MANAGEMENT CONCEPTS & ORGANISATIONAL BEHAVIOUR

Course Objectives

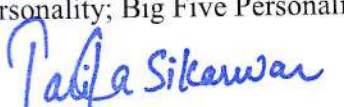

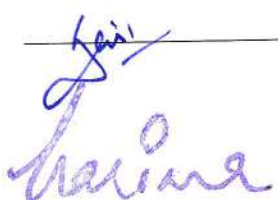

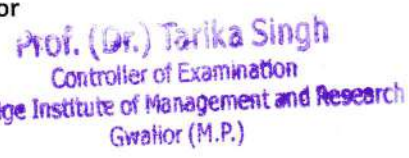

The course comprehends the functions of management and individual, group and organizational behaviour; models and metrics to measure the behaviours; and associated behavioural & organizational changes.

Course Outcomes: Upon completion of this course, the student will be able:

- CO1a: Integrate management principles into management practices.
- CO1b: Determine the nature of organization structure.
- CO2: Understand and apply control methods.
- CO3: Understand models of organizational behavior, perception, organizational change, group dynamism and organizational conflict.
- CO4: Measure Employees' attitude and Personality Types, motivation factors, leadership styles, and stress.

CO/PO Matrix					
Course Outcomes	PO1	PO2	PO3	PO4	PO5
CO1a	3	2	1	2	3
CO2b	2	2	2	2	3
CO2	3	3	3	1	2
CO3	3	2	1	2	3
CO4	3	2	3	1	3

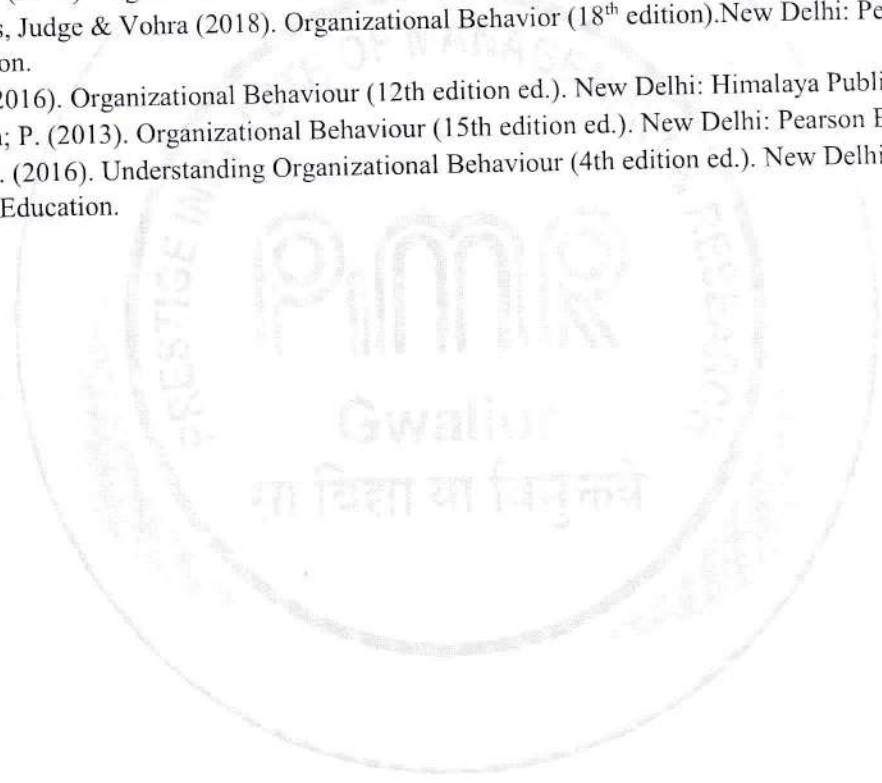

- Unit 1:** Management: Concept, Nature & Functions of Management, Levels of Management, Approaches to management, Evolution of Management.
Planning: Concept & Types of Plans; Planning Process; MBO, Introduction to PERT–CPM.
Decision Making: Decision Making - Techniques and Processes
- Unit 2:** Organizing: Organization Structure and Design, Principles of organizations.
Staffing: Concept & Process
Directing: Concept, Principles & Techniques of Directing.
- Unit 3:** Controlling: Concept; Process; Types of Control: Balance Scorecard, factors influencing control effectiveness.
Introduction to Organizational Behaviour: Nature; Importance; contributing disciplines, Models of OB.
- Unit 4:** Perception and Attribution Theory: Concept; Process; Perceptual Errors.
Learning: Theories of Learning.
Attitude: Concept; Process; Importance; Cognitive Dissonance Theory
Personality: Types and Theories of Personality; Big Five Personality Model.

 Prestige Institute of Management & Research, Gwalior
 8

Unit 5: Motivation: Concept; Theories of Motivation: Need Hierarchy Theory, Two Factor theory; Mc Clellands' Theory, Expectancy theory.
Leadership: Style and Theories of Leadership
Conflict: Concept; Classification, Resolution of Conflict
Organizational Change: Concept & Kurt Lewin Theory of Change

MBA_BA I SEMESTER MANAGERIAL ECONOMICS PAPER CODE: MBA_BA –102	Max. Marks: 100 Min. Marks: 35 External : 60 Internal: 40
-------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------

Credit: 4

MBA (BA) 102 MANAGERIAL ECONOMICS**Course Objective:**

The basic aim of this course is to impart knowledge of basic statistical tools & techniques with emphasis on their application in Business decision process and Management. Statistical analysis informs the judgment of the ultimate decision-maker—rather than replaces it—some key conceptual underpinnings of statistical analysis will be covered to insure the understandability of its proper usage.

Course Outcomes:

After completion of this course the student will be able to-

CO1a: Learn the general concepts of Managerial Economics and Demand Analysis

CO1b: Understand the concepts of Demand Elasticity and Production Analysis

CO2: Analyse the concepts of Market Structure

CO3: Understand and Implement Demand Forecasting

CO4: Calculate and Interpret the Concept of National Income, Business Cycle and Inflation

CO-PO Matrix					
Course Outcomes	PO1	PO2	PO3	PO4	PO5
CO1a	3	-	2	2	3
CO1b	3	2	2	2	2
CO2	2	3	2	2	2
CO3	2	3	3	2	3
CO4	2	1	2	1	3

Unit 1: Introduction

Introduction to Economics & Managerial Economics, Concept of Managerial Economics, Scope, Objectives of Firm, Problem in Decision making, Principles for decision making (Five fundamental concept)

Theory of the firm and Demand Analysis – Theory of the firm and Demand Analysis: Basics of demand, determinants of demand, Law of Demand, Exceptions of Law of Demand, Shift in Demand Curve. Demand Forecasting

Unit 2: Elasticity, Production and Cost Analysis

Demand Elasticity, Price Elasticity of Demand, Income Elasticity of Demand, Cross elasticity of demand; Concept of Supply & Elasticity

Production Analysis: Basic production concepts, Production with one variable input, ISOQUANT with optimal input combination and production function in the long run.

Cost of Production: Relevant costs, The cost of production, TR, AR and MR, Cost analysis.

Unit 3: Market Structure and Competitive Environment

Market Structures and Competition: Perfect Competition and Price & Output determination, Monopoly and Price & Output determination, Monopolistic competition & Price & Output determination, Oligopoly model (Price Rigidity Model)

Unit 4: Decision Making Applications

Uncertainty, Probability, and expected value, Sensitivity Analysis for One variable & Two Variable using Excel, Decision Trees, demand forecasting, Analysis using Excel- regression analysis using time series data.

Unit 5: National Income:

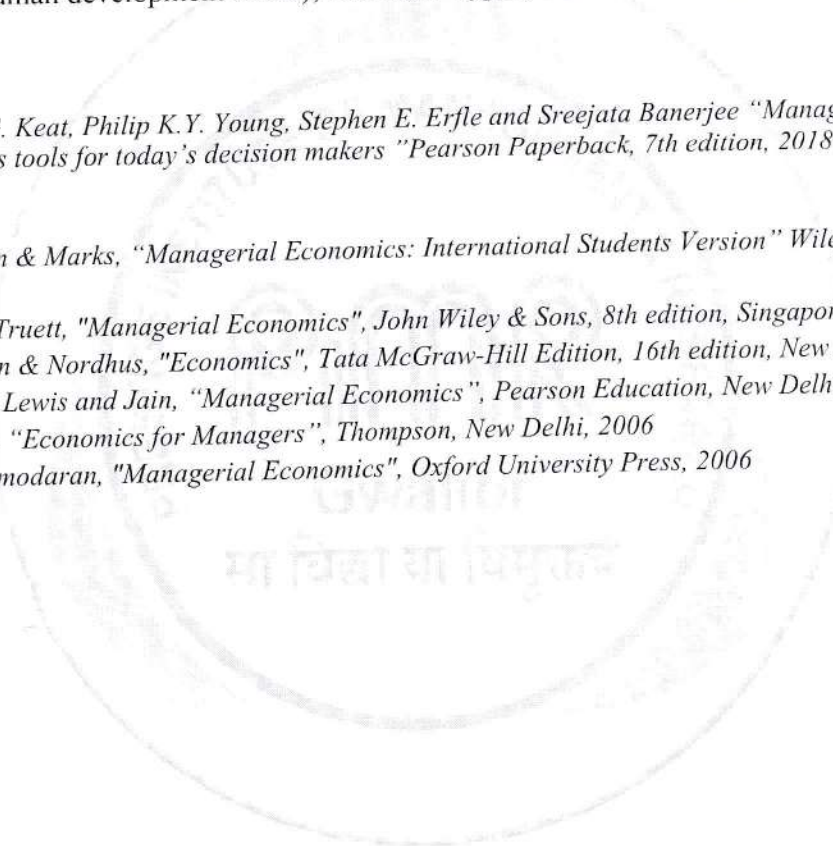

Concepts; Measuring the Value of Economic Activity through Gross Domestic Product, GDP Deflator, Real GDP vs. Nominal GDP, Demographic dividend, Green economics and HDI (Human development Index); Inflation: Types; Causes and Measurement; Business Cycle

MBA_BA I SEMESTER FINANCIAL REPORTING AND ANALYSIS PAPER CODE: MBA_BA –103	Max. Marks: 100 Min. Marks: 35 External : 60 Internal: 40
-------------------------------------------------------------------------------------	--------------------------------------------------------------------

Credit: 4

FINANCIAL REPORTING AND ANALYSIS

Course Objective:

be able to estimate the quality of financial reporting, identify possible management practices, analyze financial statements using knowledge of the underlying accounting principles, and financial analysis techniques and demonstrate the ability to prepare prospective financial information.

Course Outcomes:

CO1a: Learn the basic concepts of financial reporting.

CO1b: Understand types of financial statements and additional disclosures need to report by business entity.

CO2: Learn basic elements of financial statements.

CO3: Understand and apply financial statement analysis tools for decision making.

CO4: Learn convergence of Indian accounting standards with IFRS.

CO-PO Matrix					
Course Outcomes	PO1	PO2	PO3	PO4	PO5
CO1a	3		2	1	2
CO1b	3	1	2	2	1
CO2	2	2	3		
CO3	3	2	3	2	1
CO4	2		2	3	2

Unit 1: Financial Analysis and reporting: an Introduction

Financial Reporting: An Overview- Concept of financial reporting, financial reporting and financial statements, objectives of financial reporting, uses of financial information, benefits of financial reporting, Qualitative characteristics of financial reporting information.

Conceptual Framework- Concept, need and benefits of conceptual framework, ASB's framework for preparation and presentation of financial statements, IASB's (earlier IASC) conceptual framework, USA's FASB's conceptual framework.

Unit 2: Understanding Financial Statements

Understanding Financial Statement; Nature, Legal Requirements under Companies Act 2013, Preparation of Statement of Profit & Loss Account and Balance Sheet; Cash Flow Statement (IND AS 3)– Classification of Cash Inflows and Outflows, presentation of cash flow statement, preparation of cash flow statement. Cash Flow Statement (IND AS 7); Major changes in AS 7 vis-a-vis notifies AS 3.

Unit 3: Financial reporting

Tarika Sikwar

Shri

haine

Financial reporting –Concepts – users, Objectives of financial reporting – Qualitative characteristics of information in financial reporting – basic problems of disclosure – Role of SEBI in IFRS – Statutory disclosures in IFRS – Corporate reporting practices in India Challenges in financial reporting

Unit 4: Elements of Financial Statements

Assets- Meaning and characteristics of Assets, Assets valuation; objectives/concepts, types of assets, Introduction to IND AS 10 (Property, Plant and Equipment), Provisions and features of IND AS 16; IND AS 19- Provisions of Lease. Liabilities- meaning of Liabilities, types of liabilities, features of AS 22 about accounting for taxes on Income.

Revenues, Expenses, Gains and Losses- Concept of revenues and expenses, revenue recognition criteria, concept of gains and losses, difference between revenue and gains.

Unit 5: Analysis and Interpretation of Financial Statements

Financial Statement Analysis: Meaning and Objectives, Types of financial Analysis, Techniques of Financial Statement Analysis, Financial Statement Valuation by types of Industry.

Ratio Analysis- meaning, advantages, practical problems on different classification of ratios. Use of ratios and financial Statements for industry wise comparison. Analysis of financial reporting by corporate sector.

INTRODUCTION TO BUSINESS ANALYTICS AND DATA SCIENCE

Course Objectives:

1. Understanding the Role of Business Analyst and Data Science in business.
2. Understanding the basic concept of data management and data mining techniques
3. To understand the basic concept of machine learning
4. To understand the application of business analysis.
5. Understanding the basic concept of Data Science Project Life Cycle.

Course Outcomes:

Upon the successful completion of this course, the student will be able to:

- CO1a: Understand the role of business analytics for Business Decision making
 CO1b: Understand the role of data science in solving business problem and Data science project life cycle to prepare data
 CO2: Understand and apply data mining task and techniques for better decision making
 CO3: Apply and analyse machine learning concept various data mining task and techniques for better decision making
 CO4: Analyse the application of business analytics in different business domain.

CO/PO MATRIX					
Course Outcomes	PO1	PO2	PO3	PO4	PO5

Credit– 04

MBA (BA) –105 BUSINESS ENVIRONMENT

Course Objective

The course details about the environmental forces, both external and internal and their interaction and effect on business.

Course Outcomes: Upon the successful completion of this course, the student will be able to:

- CO1a: Understand the concept, factors of the business environment and interaction between different environments.
- CO1b: Evaluate the global environment, various laws impacting the business.
- CO2: Understand various government policies, institutions and its role in business.
- CO3: Understand the concept, role and process of EXIM policy, LPG, FDI, WTO, Global environment.
- CO4: Practical learning of SWOT, Stock Exchange and Analysis of companies.

CO/PO MATRIX					
Course Outcomes	PO1	PO2	PO3	PO4	PO5
CO1a	3	2	2	3	1
CO1b	3	2	1	3	1
CO2	2	2	2	2	2
CO3	3	2	2	2	3
CO4	2	2	3	2	1

Unit 1: Business Environment-meaning, importance; Environmental Scanning- Meaning, Scope and Process, Internal and External Environment; Interaction between Internal and External Environment; Basic Philosophies of Capitalism and Socialism with their variants; Concept of Mixed Economy.

Unit 2: Competition Act 2002 (with background of MRTP); FEMA Act 2000 (with background of FERA); Stock Exchange, SEBI Act 1992; Consumerism, Consumer Protection Act 1986 (Consumer Protection Bill 2019).

Unit 3: Industrial policy in India, Major Changes; Monetary Policies; International Monetary Fund; World Bank; Depository System in India; RBI- Roles, Functions

Unit 4: Introduction to MSME- Concept, Evolution, their role and significance in economic development, Policies for MSME, Challenges and Opportunities of MSMEs in the current scenario.

MBA_BA I SEMESTER BUSINESS STATISTICS PAPER CODE: MBA_BA –106	Max. Marks: 100 Min. Marks: 35 External : 60 Internal: 40
------------------------------------------------------------------------------	------------------------------------------------------------------------------

Credit– 04

MBA (BA) –106 BUSINESS STATISTICS

Course Objective: This course aims to equip students coming from diverse streams to handle data meaningfully and to ensure that statistics is interpreted correctly.

Course Outcomes: Upon successful completion of this course students will be able to

- CO1a: Understand the basics of descriptive and inferential statistics and present appropriate graphical statistics for different types of data.
- CO1b: Apply basic descriptive statistics like central value, dispersion, skewness and kurtosis for different types of data.
- CO2: Use correlation and regression analyses to determine the relationships between the variables.
- CO3: Demonstrate and understand concepts relating to probability and its distribution.
- CO4: Conduct and interpret a variety of hypothesis tests to aid decision making in a business context.

CO/PO MATRIX					
Course Outcomes	PO1	PO2	PO3	PO4	PO5
CO1a	2	3	3	3	3
CO1b	3	3	2	1	2
CO2	3	3	2	1	2
CO3	3	3	2	1	2
CO4	3	3	3	3	3

Unit 1: Basic concept of Statistics: Importance of Statistics, data collection methods: Primary and secondary data, data classification, data tabulation.

Presentation of Data: Bar Diagrams, Histograms, Frequency Polygon, and Frequency Distribution Curves.

Unit 2: Measures of Central Tendency and Dispersion: Mean, Median and Mode and their implications, Range, Mean Deviation, Standard Deviation, Coefficient of variation (C.V.), Skewness, Kurtosis.

Unit 3: Correlation: Meaning and types of Correlation, Karl Pearson and Spearman Rank Correlation.

Regression: Meaning, Regression Equations and their Application, Partial and Multiple Correlation and Regression.

Unit 4: Probability: Concept of Probability and its Uses in Business Decision, Addition and Multiplication Theorems, Bayes Theorem and its applications. **Probability Theoretical Distribution:** Concept and Application of Binomial, Poisson and Normal Distribution.

 Gwalior (M.P.)

Group Discussion: Online and Offline**Communication in Organization**

Coverage: Basics of Email Writing to Senior, Colleagues and Junior, Communication via Telephonic call at all level of organization, Selection of words while texting your seniors, Managers, colleagues and Juniors, What need not to be there in your communication via any mode to your Seniors, managers, Colleagues and Juniors, Sample of Professional Email, Text messages, What's App messages, Do's and Dont's while you are communicating at different hierarchical level in your organization, Importance and need of Acknowledgement to communication which you receives at different level in organization, How to greet your seniors, Colleagues and Juniors face to face or via any virtual Mode, Few sample sentences, idioms, Phrases, Salutations for making communication effective

Note: Students should be guided to prepare an office communication report file for the evaluation purpose along with one objective test.

MBA_BA I SEMESTER INTRODUCTION TO PYTHON FOR BUSINESS ANALYTICS PAPER CODE: MBA_BA –108	Total Marks: 50 Min. Marks: 09 External :25 Internal: 25
------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------

Credits: 02

INTRODUCTION TO PYTHON FOR BUSINESS ANALYTICS (PRACTICAL)

Course Objectives:

Upon successful completion of the course, students will be able to

1. Predict the result of a given piece of Python code.
2. Write Python code to read, write, filter, merge, summarize, and graph a given dataset.
3. Analyze data from a variety of industries and uncover business insights.
4. Communicate effectively the purpose, methodology, and result of an analysis involving Python to a non-technical business audience.

Course Outcomes: On completion of this course student will be able to learn

- CO1a: Understand the basic concept, rules and logic applied on data for analysis with the help of Python.
- CO1b: Demonstrate the knowledge through various practical exercises and report to aid decision making in a business context.

CO-PO Matrix					
Course Outcomes	PO1	PO2	PO3	PO4	PO5
CO1a	NA	1	1	NA	2
CO1b	NA	1	1	NA	2

MBA_BA II SEMESTER MARKETING MANAGEMENT PAPER CODE: MBA_BA –201	Max. Marks: 100 Min. Marks: 35 External :60 Internal: 40
--------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------

MARKETING MANAGEMENT

Course Objective:

The overall objectives are to understand consumers and to identify profitable Marketing strategies. Understand the Marketing context: Market, performance metrics, and role of strategic planning in marketing. Describe marketing strategies of segmenting, targeting, positioning, and differentiation. Know how to use marketing functions of product, pricing, distribution, and marketing communication for a firm's Marketing strategy. Evaluate several customer relationship management (CRM) strategies using analytics.

Course Outcomes:

On completion of the course students will

Course Outcomes:

On completion of the course students will

- CO1a- Understand the Various concept related to Marketing management and Marketing environment
- CO1b- Illustrate the various concept related to marketing Segmentation, targeting and positioning
- CO2- Analyse the concept of Marketing mix and understand role of distribution channels in Marketing
- CO3- Comprehend the role of promotion mix in marketing.
- CO4- Evaluate and Identify the Various aspect of digital marketing and Retailing

CO/PO MATRIX

Course Outcomes	PO1	PO2	PO3	PO4	PO5
CO1a	2	2	1	3	1
CO1b	2	2	0	3	1
CO2	2	2	1	2	1
CO3	1	2	2	2	3
CO4	1	2	1	2	2

Unit 1: INTRODUCTION TO MARKETING

Definition, Nature, Elements and Scope of Marketing; Marketing concepts; Marketing philosophies. Holistic Marketing, Concept of marketing orientation and consumer orientation; Concept of marketing environment- Micro and Macro. Qualities of Marketing personnel.

Unit 2: MARKETING STRATEGY

Market Segmentation- Purpose and Methods of Marketing Segmentation, Levels of segmentation, Patterns, Bases of Segmentation. Concept of Targeting: Selection of Target Markets, Strategies, Concept of positioning: Types, major errors, Product Differentiations: Variables in Differentiation. Sample corporate segmentation.

for
Pooja Sikarwar

Trina
Prof. (Dr.) Tarika Singh
Controller of Examination
Prestige Institute of Management and Research
Gwalior (M.P.)

Unit 3: Marketing Mix

Product Planning - Product Mix Decisions, Product Line, New Product Development, Product Life Cycle; Branding: Brands and Brand strategies; Pricing: Objectives, Methods, strategies; Channel of Distribution(COD): Levels, role, COD Strategies. Role in Value Chain -Inbound and outbound logistics; Promotional Mix: Sales Promotion, Advertisement, personal Selling and Sales Management, Public Relation, Publicity.

Unit 4: E-MARKETING RESEARCH

Data Drive Strategy – Marketing Knowledge Management; Social Media Marketing: defining goals and measurement plans, Categories of Social Media, evaluating ROI; improving post performance; Technology Enabled Approaches in Marketing, Real-Space Approaches, Marketing Databases and Data Warehouses; Data Analysis and Distribution,

Unit 5: RETAIL ANALYTICS

Customer Analytics Overview, Quantifying Customer Value; The digital evolution of retail marketing, Digital natives, Search Engine Optimization: content marketing, search analytics; Website Analytics: common metrics, dimensions, and KPIs; Social Listening: share of voice, sentiment analysis, and other User Generated Content.

MBA_BA II SEMESTER OPERATIONS AND SUPPLY CHAIN MANAGEMENT PAPER CODE: MBA_BA –202	Max. Marks: 100 Min. Marks: 35 External: 60 Internal: 40
------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------

OPERATIONS AND SUPPLY CHAIN MANAGEMENT

Course Objectives:

The students learn the nuances of forecasting, facility design, location, inventory, aggregate planning; students will also learn elements of supply chain, network design & logistics management, purchasing & vendor management.

Course outcomes: On completion of the course, the students will be able to:

- CO1a: Learn the general concepts of supply chain, operations, plant location and layout planning
- CO1b: Understand the concepts of forecasting, production planning and capacity planning
- CO2: Learn the concepts of aggregate planning and inventory management
- CO3: Analyze the network design, logistics management of a firm and purchasing & vendor management
- CO4: Understand the recent issues in supply chain management and role of IT in supply chain

CO-PO Matrix					
Course Outcomes	PO1	PO2	PO3	PO4	PO5
CO1a	3	-	3	3	2
CO1b					
CO2	3	2	3	2	2
CO3	3	2	3	2	3
CO4	-	-	2	1	1

Unit 1: Introduction

An overview, Definition of operations management, Responsibilities of Operations Manager, Plant Location, Process selection and design, Layout Planning. Basic Concepts, Objectives, Essential Features and Benefits of Supply Chain, Evolution of SCM, Various Flows (Cash, Value and Information), Key Issues in SCM. Numerical problems on deciding plant location through Centroid Method.

Unit 2: Forecasting

Forecasting as a planning tool, Forecasting types and methods (Qualitative and Quantitative).

Capacity Planning

Production Planning techniques, Capacity management, Line of balance, scheduling types and principles.

Numerical problems on Quantitative methods of Forecasting and system capacity & system efficiency.

haini
gen

Prestige Institute of Management & Research, Gwalior
Pooja Sikawar 27

Prof. (Dr.) Tarika Singh
Controller of Examination
Prestige Institute of Management and Research
Gwalior (M.P.)

Unit 3: Aggregate Planning

Introduction of Aggregate Planning, Techniques for Aggregate Planning, Aggregate Planning in Services, Disaggregating the aggregate plan.

Inventory Management

Inventory Management- Objective, Nature and Importance of Inventories, Requirements for effective Inventories, Inventory Ordering Policies, Inventory control techniques- ABC, VED, EOQ, SED, FSN Analysis.

Numerical problems on Inventory control techniques.

Unit 4: Network Design and Logistics Management

The role of Network Design in the Supply Chain, Factors influencing Network Design Decisions, Logistics as part of SCM, Logistics Costs, Different Models, Logistics Sub- System, Inbound and Outbound Logistics, Bullwhip Effect in Logistics, Distribution and Warehousing Management.

Purchasing and Vendor Management

Centralized and Decentralized Purchasing, Functions of Purchase Department and Purchase Policies, Single Vendor Concept, Management of Stores, Accounting for Materials.

Practical - Use of Mathematical Model for Vendor Rating / Evaluation.

Unit 5: Recent Issues in SCM

Role of Computer/ IT in Supply Chain Management, The Supply Chain IT Framework, Customer Relationship Management, Internal Supply Chain Management, Supplier Relationship Management, The Transaction Management Foundation, The Future of IT in the Supply Chain, Risk Management in IT, Supply Chain IT in Practice.

MBA_BA II SEMESTER CORPORATE FINANCE PAPER CODE: MBA_BA –203	Max. Marks: 100 Min. Marks: 35 External :60 Internal: 40
-----------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------

MBA_BA –203 CORPORATE FINANCE

Learning Objective:

This course is intended to introduce the basic theory, concepts, and practical applications in corporate finance and to enable students to analyze various corporate decisions.

Course Outcomes: Upon completion of this course, the students will be

- CO1a: Understand the fundamentals, various models and agency problems of Corporate Finance.
- CO1b: Acquire knowledge about various aspects of cost of capital and capital budgeting techniques for analyzing long-term projects.
- CO2: Acquaint with the various capital structure theories and practicality of leverage in the context of business.
- CO3: Comprehend various dividend models and its applicability.
- CO4: Familiar with the concept of working capital and its management.

Course Outcomes	PO1	PO2	PO3	PO4	PO5
CO1a	3	3	2	1	2
CO1b	3	3	1	2	2
CO2	3	3	1	1	1
CO3	3	3	3	2	2
CO4	3	3	3	2	2

Unit 1: Introduction to Finance & Corporate Finance: Corporate Finance, objectives & its scope, Corporate Governance and Agency Problem, Time Value of Money: Present and future value of single payments, annuities, annuities due, and perpetuities - Growth in annuities and perpetuities - Compound interest and continuous compounding - Annual percentage rates and effective annual rates - Mathematics of loans: Discount, Interest only, Full and partial amortization.

Unit 2: Investment Decision: Concept of Opportunity Cost, Cost of Debenture, Preference and Equity capital, Composite Cost of Capital, Capital Budgeting Decisions, Calculation of NPV and IRR, Case Study.

Unit 3: Financial Decision: Capital Structure, Capital Structure Theories: Relevance and Irrelevance theory, Leverage analysis – financial, operating and combined leverage along with its implications, EBIT- EPS Analysis, Point of Indifference.

Unit IV- Dividend Decisions: Dividend Policy, Factors affecting Dividend Policy, Forms of Dividends, Types of Dividend Policies, Dividend Models: Walter and Gordon Model, Miller- Modigliani (MM) Hypothesis.

MBA_BA II SEMESTER MACHINE LEARNING & APPLICATIONS PAPER CODE: MBA_BA –204	Max. Marks: 100 Min. Marks: 35 External : 60 Internal: 40
---------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------

MACHINE LEARNING & APPLICATIONS

Course Objectives: The objective of the course is to learn what machine learning is and how it is related to data analysis and statistics. The course will impart knowledge on how various machine learning algorithms search for data patterns which can be used to make decisions and predictions for practical problem solving.

Course Outcomes: Students will be able to:

- CO1a: Gain knowledge about basic concepts of Machine Learning
- CO1b: Identify machine learning techniques suitable for a given problem
- CO2: Understand decision tree and ANN techniques for solving the real problem in machine learning
- CO3: Apply the bayes algorithms to in business problem.
- CO4: Understand the unsupervised learning techniques and their algorithm for solve the business problem.

CO/PO matrix					
Course Outcomes	PO1	PO2	PO3	PO4	PO5
CO1a	3	1	2	2	3
CO1b	3	2	3	2	2
CO2	3	3	3	3	3
CO3	2	3	3	3	2
CO4	2	3	3	2	2

Unit 1: Introduction to Machine Learning: Learning Issues, designing a learning system, perspectives & issues in machine learning, concept learning and general to specific ordering. Overview of different tasks: classification, regression, clustering.

Unit 2: Categorization of Machine Learning Techniques Categories of machine learning techniques with brief introduction of each category: Decision trees, Bayesian learners, Ensemble learners, neural networks, support vector machines, rule-based learning, search-based techniques.

Unit 3: Decision Trees and Artificial Neural Networks Decision Trees: Introduction, Tree representation, Appropriate problems, Hypothesis space search, inductive bias, issues. Artificial Neural Networks: Introduction, Network representation, appropriate problems, perceptions, back-propagation.

MBA_BA II SEMESTER HUMAN RESOURCE MANAGEMENT PAPER CODE: MBA_BA –205	Max. Marks: 100 Min. Marks: 35 External :60 Internal : 40
-------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------

Credit: 4

HUMAN RESOURCE MANAGEMENT**Course Objective:**

1. To enable the students to understand HR Management system at various levels in industries or organizations.
2. To enable them to integrate the understanding of various HR concepts along with the domain concept in order to take correct business decisions

Course Outcomes: On completion of the course, the students will be able to:

- CO1a: Develop an understanding of the concepts of HRM and essential skill sets required to become HR professional.
- CO1b: Contribute to the implementation and evaluation of plans related to employee recruitment, selection, training, retention, and appraisal processes in an organization.
- CO2: Integrate the knowledge of HR concepts to take the best managerial decisions.
- CO3: Design rationally the salary and compensation structure.
- CO4: Create pay slip, offer letter, develop and use HR Metrics and write Job Advertisements.

CO/PO MATRIX					
Course Outcomes	PO1	PO2	PO3	PO4	PO5
CO1a	3	3	2	2	2
CO1b	3	3	3	2	1
CO2	3	3	3	2	2
CO3	2	3	3	3	2
CO4	2	2	2	2	1

Unit 1: The Dynamic Environment of HRM: Introduction, Functions, Scope and Significance of HRM; Human Capital in Organizations; Managing Human Resources in Organizations; HR Management Roles, Evolution of HRM, HR Management Competencies and Careers

Unit 2: Manpower Acquisition: HR planning, Job Analysis- Nature, Methods and approaches, Job Description, Job Specification, Job Evaluation, Recruitment-Types and Sources, Selection – Process and Techniques, Role of Technology in recruitment & Selection
Training – Concept, training process, techniques

Unit 3: Establishing the Performance Management System: Introduction; Purpose; Appraisals Process, Appraisals Methods, Tools for measuring employee performance
Internal Mobility and Separation of Employees Transfer, Promotion and Separation of employees
Employee welfare: A brief introduction

Handwritten signature: Tarika Sikarwar

MBA_BA II SEMESTER DECISION SCIENCE PAPER CODE: MBA_BA –206	Max. Marks:100 Min. Marks: 35 External: 60 Internal: 40
----------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------

MBA (BA) –206 DECISION SCIENCE

Course Objective: The course aims in providing the students with a comprehensive study of various application areas of decision science through relevant examples. The main objective is to provide necessary mathematical support and confidence to the students to tackle real life problems.

- Course Outcomes:** On successful completion of the course, students will be able to
- CO1a: Know and understand the various techniques of Decision making Environments.
 - CO1b: Define, Sketch and Apply LP technique to translate a real-world problem.
 - CO2: Demonstrate and Solve game and sequencing problems.
 - CO3: Understand the concept of Queuing System and identify variations using SQC tools.
 - CO4: Familiar with the concept of replacement theory and CPM PERT.

CO/PO MATRIX					
Course Outcomes	PO1	PO2	PO3	PO4	PO5

MBA_BA II SEMESTER MACHINE LEARNING USING R PAPER CODE: MBA_BA –207	Total Marks: 50 Min. Marks: 09 External :25 Internal: 25
------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------

Credit: 2

MACHINE LEARNING USING R (Practical)

Course Objectives: The objective of the course is to learn applications of various machine learning concepts using R language. The course would enable the ability to understand and critically assess available data using machine learning methods.

Course Outcomes: Students will be able to:

- CO1a: Understand the basics and use of R programming in terms of constructs, control statements, string functions.
- CO2b: Able to apply and demonstrate the tools, techniques and algorithms to solve business problem.

CO/PO MATRIX					
Course Outcomes	PO1	PO2	PO3	PO4	PO5
CO1a	3	3	3	2	1
CO1b	3	3	3	2	0

Unit 1: R Basics and Language

Getting and Installing R, The R user Interface, A short R tutorial, R packages. Overview: Expressions, Objects, Symbols, Functions. Syntax: Constants, Operators, Expressions, Control Structures, Accessing Data Structures. R Objects: Primitive object types, vectors, lists, other object types. Symbols and Environment: Symbols, Global environment, environment and functions, exceptions.

Unit 2: Functions and Object Oriented Programming Functions:

Arguments, Return values, Function as arguments, side effects. Object Oriented Programming: Overview, Defining Classes, new objects, accessing slots, working with objects, creating coercion methods, methods, basic classes. High performance R with built in math functions, lookup tables etc.

Unit 3: Working with Data

Entering Data Within R, Entering Data Using R Commands, Using the Edit GUI, Saving and Loading R Objects, Importing Data from External Files, Exporting and Importing Data from Databases. Preparing Data: Combining Data Sets, Transformations, Binning Data, Subsets, Summarizing Functions, Data Cleaning, An overview of R graphics.

Travina
ghr

Unit 4: Statistics with R

Analyzing Data: Summary Statistics, Correlation and Covariance, Principal Components Analysis, Factor Analysis, Bootstrap Resampling. Probability Distributions: Normal Distribution, Common Distribution-Type Arguments, Distribution Function Families. Statistical Tests for Continuous and Discrete Data, Power Tests: Experimental Design

Unit 5: Regression Analysis

Regression Models: A Simple Linear Model, Fitting a Model, Refining the Model, Details About the lm Function, Assumptions of Least Squares Regression, Subset Selection and Shrinkage Methods, Stepwise Variable Selection, Ridge Regression, Lasso and Least Angle Regression. Principal Components Regression and Partial Least Squares Regression. Implementation of Machine Learning models using R.

MBA_BA II SEMESTER DATABASE & SQL LAB PAPER CODE: MBA_BA –208	Total Marks: 50 Min. Marks: 09 External :25 Internal: 25
----------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------

Credit: 2

DATABASE AND SQL LAB

Course Objectives:

This course has theory and practical lab session to provide a foundation in data management concepts and database systems. It includes representing information with the relational database model, manipulating data with an interactive query language (SQL) and database programming, database development including internet applications, and database security, integrity and privacy issues.

Learning Outcomes: After completion of this course student will be able to

CO1a: Understand the concept of Database Management System and ER-Model.

CO1b: Demonstrate the Understanding of relational databases and apply tools for data management using Oracle/MS-Access/MySql.

CO-PO Matrix					
Course Outcomes	PO1	PO2	PO3	PO4	PO5
CO1a	3	2	3	NA	NA
CO1b	2	2	3	NA	NA

Unit 1: Introduction to database and data models

Database: Definition, purpose of database system, various view of data; database architecture: View/Schema, Logical-view, conceptual-view, physical-view and their interrelationship, transaction management; Data Models: The importance of data models, Basic building blocks, Business rules, The evolution of data models, Degrees of data abstraction.

Unit 2: Database Design, ER-Diagram and Normalization:

Database design and ER Model: overview, ER-Model, Constraints, ER-Diagrams, ERD Issues, weak entity sets, Codd's rules, Relational Schemas: Logical view of data, keys, integrity rules. Relational Database design: features of good relational database design, atomic domain and Normalization (1NF, 2NF, 3NF).

Unit 3: SQL Basics

SQL Data Types, Basic SELECT Statement, Selecting All Columns, Selecting Specific Columns, Writing SQL Statements, Column Heading Defaults, Arithmetic Expressions, Using Arithmetic Operators, Operator Precedence, Using Parentheses, Defining a Null Value, Null Values in Arithmetic Expressions, Defining a Column Alias, Using Column Aliases, Concatenation Operator, Using the Concatenation Operator, Literal Character Strings, Using Literal Character Strings, Duplicate Rows, Eliminating Duplicate Rows

Tarika
Geni

Tarika Sikarwar

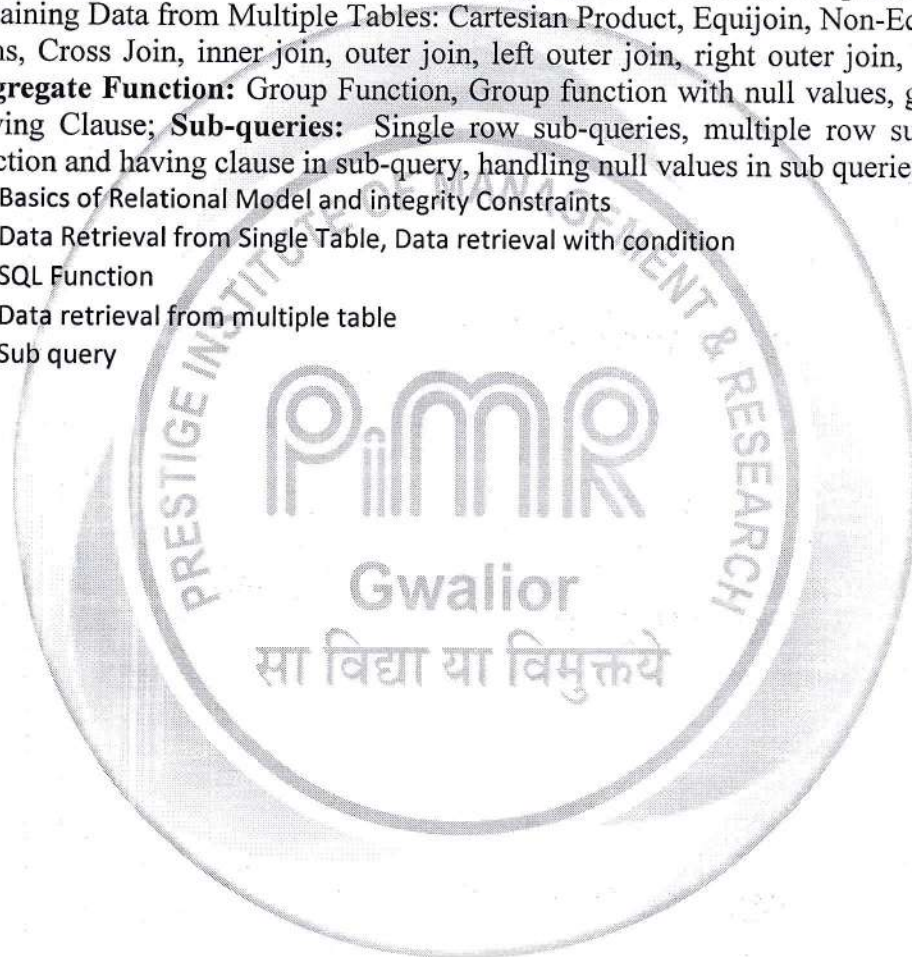

Unit 4: Restricting and Sorting Data, SQL Function

Limiting Rows Using a Selection, Limiting the Rows Selected, Using the WHERE Clause, Character Strings and Dates, Comparison Conditions, Using Comparison Conditions, Other Comparison Conditions, Using the BETWEEN Condition, Using the IN Condition, Using the LIKE Condition, Using the NULL Conditions, Logical Conditions, Using the AND Operator, Using the OR Operator, Using the NOT Operator, Rules of Precedence, ORDER BY Clause, Sorting in Descending Order, Sorting by Column Alias, Sorting by Multiple Columns; **SQL Function:** Character Functions, Case Manipulation Functions, Number Functions, Date Functions, Conversion Functions, Elements of the Date Format Model, Using the TO_CHAR Function with Dates

Unit 5: Displaying Data from Multiple Tables, Aggregate Function, sub-queries

Obtaining Data from Multiple Tables: Cartesian Product, Equijoin, Non-Equijoins, Natural Joins, Cross Join, inner join, outer join, left outer join, right outer join, Full outer Join; **Aggregate Function:** Group Function, Group function with null values, group by clause, Having Clause; **Sub-queries:** Single row sub-queries, multiple row sub query, group function and having clause in sub-query, handling null values in sub queries.

1. Basics of Relational Model and integrity Constraints
2. Data Retrieval from Single Table, Data retrieval with condition
3. SQL Function
4. Data retrieval from multiple table
5. Sub query

MBA_BA II SEMESTER PROJECT- DATA ANALYSIS WITH PYTHON PAPER CODE: MBA_BA -209	Total Marks: 100 Min. Marks: 18 External :50 Internal: 50
--------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------

Project- Data Analysis with Python

Course Objectives:

This course has practical lab session to provide a foundation in data analysis with python.

Learning Outcomes: After completion of this course student will be able to

CO1a: Understand the concept of data analysis with the help of Python.

CO1b: Apply and demonstrate the knowledge of python tools through practical report.

CO-PO Matrix					
Course Outcomes	PO1	PO2	PO3	PO4	PO5
CO1a	3	2	3	1	1
CO1b	2	2	3	1	1

MBA BA III SEMESTER BIG DATA ANALYTICS PAPER CODE: MBA-BA –301	Max. Marks: 100 Min. Marks: 35 External :60 Internal: 40
-------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------

BIG DATA ANALYTICS

COURSE OBJECTIVES:

- Understand the Big Data Platform and its Uses
- Provide an overview of Apache Hadoop
- Provide Concepts and Interfacing with HDFS (Hadoop Distributed File System)
- Provide Basics understanding of Map Reduce and its applicability
- Provide Basics understanding of Hadoop Eco System

COURSE OUTCOMES: The students will be able to:

CO1a: Understand Big Data and its Business Implications

CO1b: Elaborate the components of Hadoop and Hadoop Eco-System

CO2: Demonstrate the Process Data on Hadoop Distributed File System

CO3: Explain Job Execution in Hadoop Environment

CO4: Analyse Big Data Solutions using Spark

CO/PO MATRIX					
Course Outcomes	PO1	PO2	PO3	PO4	PO5
CO1a	3	2	1	3	1
CO1b	2	3	2	2	1
CO2	3	3	3	2	2
CO3	3	3	2	3	2
CO4	2	2	3	2	2

Unit 1: INTRODUCTION TO BIG DATA Analytics

Introduction to big data Analytics, Big Data Platform, Challenges of Conventional Systems - Intelligent data analysis, Nature of Data, Analytic Processes and Tools, Analysis vs Reporting

Unit 2: Introduction to Hadoop

Basics of Hadoop, History of Hadoop, Architecture of Hadoop, Apache Hadoop, Analyzing Data with Hadoop, Hadoop Streaming, Introduction to Hadoop Echo System

Unit 3: HDFS (Hadoop Distributed File System)

The Design of HDFS, HDFS Concepts, Command Line Interface, Hadoop file system interfaces, Data flow, Data Ingest with Flume and Scoop and Hadoop archives, Hadoop I/O: Compression, Serialization, Avro and File-Based Data structures.

harina

Tarika Sikawan

Gen's

Unit 4: Map Reduce

Anatomy of a Map Reduce Job Run, Failures, Job Scheduling, Shuffle and Sort, Task Execution, Map Reduce Types and Formats, Map Reduce Features.

Unit 5: Spark

Relationship between Apache Spark and Hadoop Ecosystem, Apache Spark Architecture and how it works, development life-cycle of Apache Spark Applications, Apache Spark use-cases and advanced characteristics

MBA(BA) III SEMESTER Multivariate Data Analysis PAPER CODE: MBA(BA)-302	Max. Marks:100 Min. Marks: 35 External: 60 Internal: 40
----------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------

MBA(BA) - 302 Multivariate Data Analysis

Course Objective: The course emphasis on problem based learning focusing on the application of data analysis techniques for addressing the research questions at the heart of their own research projects. Describe the data analysis using the advanced statistical techniques.

Course Outcomes: On successful completion of the course, students will be able to

CO1a: Understand the conceptual foundations of research.
 CO1b: Describe sampling design and recognize various tools of measurement of data.
 CO2: Identify and analyze the essential features of data preparation.
 CO3: Describe and demonstrate the predictive analytics, namely, the regression technique.
 CO4: Define and understand the various multivariate techniques.

CO-PO Matrix					
Course Outcomes	PO1	PO2	PO3	PO4	PO5
CO1a	2	1	3	3	3
CO1b	3	2	3	2	3
CO2	2	3	2	2	2
CO3	3	3	2	2	3
CO4	3	3	3	2	3

Course Contents:

Unit 1: Conceptual Foundations of Research: Meaning of research and scope of methodology, Identification of problem area, Formulation of research questions, Typology of Research Designs. Overview of quantitative research, conceptual framework in quantitative research. Introduction to academic writing, structure of academic writing.

Unit 2: Sampling Design and Measurement Tools: Sampling: Process and Types: probability and non probability sampling. Scaling techniques meaning, types of scales–Hypothesis testing Statistical significance, statistical test procedure. Validity: Internal and external validity, Reliability: Factors influencing reliability.

Unit 3: Data Preparation and Analysis: Data Preparation: editing, coding, data entry. Test of significance: assumptions about parametric and nonparametric tests. Application of statistical software for data analysis.

Unit 4: Predictive Analysis: Simple linear regression: Coefficient of determination, Significance tests, Residual analysis, Confidence and Prediction intervals. Multiple linear regressions: Coefficient of multiple coefficient of determination, Interpretation of regression coefficients, heteroscedasticity, multi-collinearity, outliers.

Tarika
Geni

Unit 5: Multivariate Designs and Analysis: Introduction to Multivariate methods and analysis: Discriminant Analysis, Factor analysis, Structural equation modelling (SEM), Meta analysis, Mediation Analysis, Canonical Analysis.

MBA_BA III SEMESTER PRACTICAL LAB ON BIG DATA PAPER CODE: MBA-BA –306	Total Marks: 50 Min. Marks: 09 External :25 Internal: 25
--------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------

PRACTICAL LAB ON BIG DATA

Objectives:

CO1a: Understand the need of big data analytics, architecture of Hadoop and techniques to analyse data.

CO1b: Demonstrate the knowledge of big data analytics and implement different file management task in Hadoop.

CO/PO Matrix					
Course Outcomes	PO1	PO2	PO3	PO4	PO5
CO1a	3	3	2	1	1
CO1b	3	3	3	1	1

Lab Exercises:

1. (i) Perform setting up and Installing Hadoop in its two operating modes:
 - Pseudo distributed,
 - Fully distributed.
- (ii) Use web based tools to monitor your Hadoop setup.
2. (i) Implement the following file management tasks in Hadoop:
 - Adding files and directories
 - Retrieving files
 - Deleting files
- ii) Benchmark and stress test an Apache Hadoop cluster
3. Run a basic Word Count Map Reduce program to understand Map Reduce Paradigm.
 - Find the number of occurrence of each word appearing in the input file(s)
 - Performing a MapReduce Job for word search count (look for specific keywords in a file)
4. Stop word elimination problem:
 - Input:
 - A large textual file containing one sentence per line
 - A small file containing a set of stop words (One stop word per line)
 - Output:
 - A textual file containing the same sentences of the large input file without the words appearing in the small file.
5. Write a Map Reduce program that mines weather data. Weather sensors collecting data every hour at many locations across the globe gather large volume of log data, which is a good candidate for analysis with Map Reduce, since it is semi structured and record-oriented. Data available at: <https://github.com/tomwhite/hadoopbook/tree/master/input/ncdc/all>.
 - Find average, max and min temperature for each year in NCDC data set?

Traine
han

Prof. (Dr.) Tarika Singh
46

- Filter the readings of a set based on value of the measurement, Output the line of input files associated with a temperature value greater than 30.0 and store it- in a separate file.
- 6. Purchases.txt Dataset
 - Instead of breaking the sales down by store, give us a sales breakdown by product category across all of our stores
 - What is the value of total sales for the following categories?
 - Toys
 - Consumer Electronics
 - Find the monetary value for the highest individual sale for each separate store
 - What are the values for the following stores?
 - Reno
 - Toledo
 - Chandler

Find the total sales value across all the stores, and the total number of sales.

7. Install and Run Pig then write Pig Latin scripts to sort, group, join, project, and filter your data.
8. Write a Pig Latin scripts for finding TF-IDF value for book dataset (A corpus of eBooks available at: Project Gutenberg)
9. Install and Run Hive then use Hive to create, alter, and drop databases, tables, views, functions, and indexes.
10. Install, Deploy & configure Apache Spark Cluster.
11. Data analytics using Apache Spark on Amazon food dataset, find all the pairs of items frequently reviewed together.
 - Write a single Spark application that:
 - Transposes the original Amazon food dataset, obtaining a Pair RDD of the type:
 - $\langle \text{user_id} \rangle \rightarrow \langle \text{list of the product_ids reviewed by user_id} \rangle$
 - Counts the frequencies of all the pairs of products reviewed together;
 - Writes on the output folder all the pairs of products that appear more than once and their frequencies.The pairs of products must be sorted by frequency.

MBA_BA III SEMESTER DATA VISUALIZATION LAB PAPER CODE: MBA-BA –307	Total Marks: 50 Min. Marks: 09 External :25 Internal: 25
-----------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------

Data Visualization Lab

Course Objectives:

This course covers practical implementation of concepts regarding visualization tools and techniques using Python and Power BI.

Course Outcomes: On successful completion of the course, the students will be able to:

CO1a: Understand practical concepts of data visualization & storage.

CO1b: Demonstrate knowledge about Python libraries and PowerBI regarding Data Visualization.

CO-PO Matrix					
Course Outcomes	PO1	PO2	PO3	PO4	PO5
CO1a	3	3	2	NA	NA
CO1b	3	3	2	NA	NA

Unit 1: Introduction to Data Science with Python: The Stages of Data Science, Python Learning Resources, Python Environment and Editors, The Basics of Python Programming, Fundamental Python Programming Techniques: Types of statements, Exception Handling, String Processing, Tabular Data and Data Formats, Python Pandas Data Science Library, Python Lambdas and the Numpy Library, Data Cleaning and Manipulation Techniques, Abstraction of the Series and Data Frame.

Unit 2: Introducing Data Visualization Techniques: Loading Libraries, Popular Libraries for Data Visualization in Python, Introducing Plots in Python, Data Collection Structures: Lists, Dictionaries, Tuples, Series, Data Frames, File I/O Processing, Regular Expressions,

Unit 3: Data Gathering and Cleaning: Cleaning Data, Reading and Cleaning CSV Data, Merging and Integrating Data, Reading Data from the JSON Format, Reading Data from the HTML Format, Reading Data from the XML Format, Data Exploring and Analysis, Statistical Analysis, Data Grouping, Iterating Through Groups, Aggregations, Transformations, Filtration.

Unit 4: Data Visualization: Direct Plotting, Line Plot, Bar Plot, Pie Chart, Box Plot, Histogram Plot, Scatter Plot, Seaborn Plotting System, Strip Plot, Box Plot, Swarm Plot, Joint Plot, Mat plot, lib Plot,

Unit 5: Case Studies: Data Gathering, Data Analysis, Data Visualization, Findings, Introduction to Power BI, Power BI Desktop Visualizations, Modeling with Power BI, Power BI Service, Practical hands on different datasets using Power BI.

MBA_BA III SEMESTER SUMMER TRAINING REPORT & PRESENTATION PAPER CODE: MBA-BA –308	Total Marks: 100 Min. Marks: 18 External :50 Internal: 50
----------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------

SUMMER TRAINING REPORT & PRESENTATION

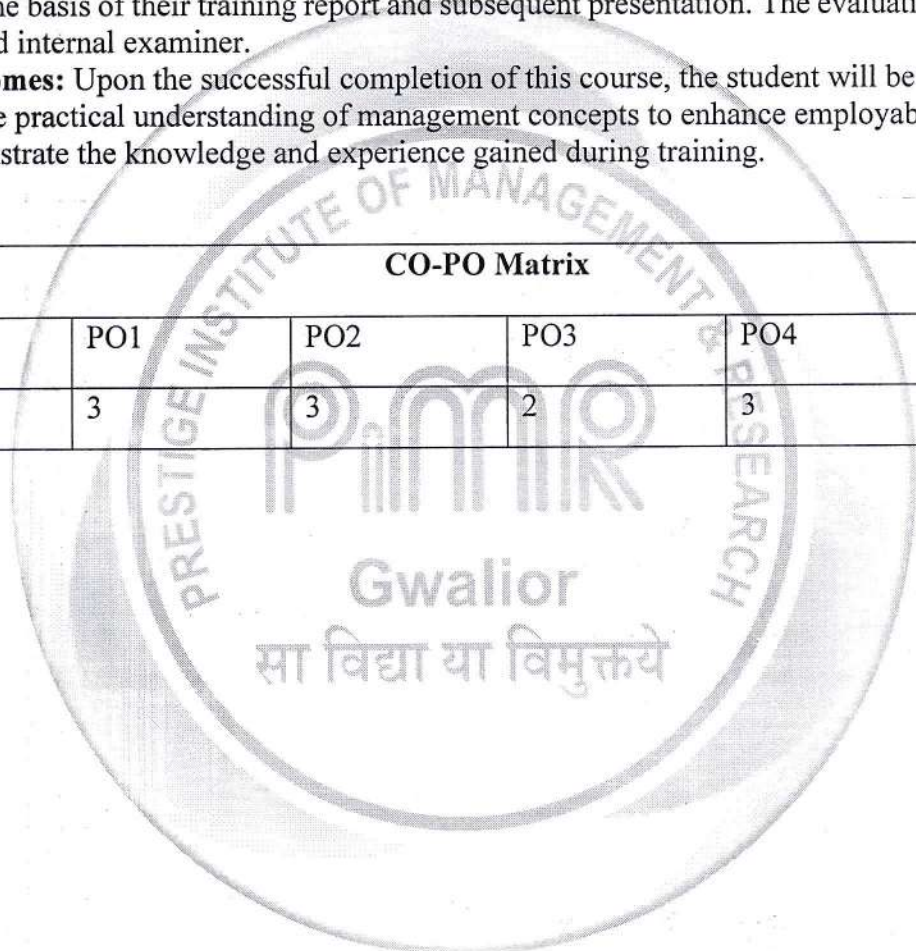

The students will be doing up to forty five days summer internship program arranged by the institute in the different organizations after the completion of second semester of program. Students will be evaluated on the basis of their training report and subsequent presentation. The evaluation will be done by external and internal examiner.

Course Outcomes: Upon the successful completion of this course, the student will be able to:

CO1a: Acquire practical understanding of management concepts to enhance employability skills.

CO1b: Demonstrate the knowledge and experience gained during training.

MBA_BA IV SEMESTER ENTREPRENEURSHIP AND SMALL BUSINESS DEVELOPMENT PAPER CODE: MBA-BA –401	Max. Marks: 100 Min. Marks: 35 External :60 Internal: 40
---------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------

ENTREPRENEURSHIP AND SMALL BUSINESS DEVELOPMENT

Course Objective:

This course introduces the students to the basics of entrepreneurship and small business development and students gain an understanding of how to establish and manage a small business.

Course Outcomes: After the completion of the course, the students will be able to:

- CO1a: Develop the skills and qualities required to be a successful entrepreneur.
- CO1b: Understand the theories of entrepreneurship and the challenges faced by women and rural entrepreneurs.
- CO2: Learn about creating entrepreneurial venture and feasibility studies in project development.
- CO3: Analyze and compare the different funding agencies available for training and funding new enterprises.
- CO4: Analyze and compare the different entrepreneurial agencies available for the growth of Entrepreneurship in India.

CO-PO Matrix					
Course Outcomes	PO1	PO2	PO3	PO4	PO5
CO1a	3	1	2	3	2
CO1b	3	1	3	3	3
CO2	3	3	3	2	2
CO3	3	1	3	2	3
CO4	-		2	1	1

Unit 1: Evolution and Concept of Entrepreneurship, Concept of Entrepreneur, Corporate Entrepreneurship, Characteristics of Successful Entrepreneurs, Entrepreneurship, Innovation, Invention, Creativity, Business Idea & Opportunities through change in Entrepreneurship, Entrepreneurship as a Career, Changing Role of the Entrepreneur.

Unit 2: Theories of Entrepreneurship: Innovation Theory by Schumpeter and Theory of High Achievement by McClelland. Role of Women Entrepreneurs, Challenges and Achievements of Women Entrepreneurs. Role and Challenges of Rural Entrepreneurs, and Scope of Small Business Activities in National Economy.

Unit 3: Creating Entrepreneurial Venture- Opportunity / Identification and Product/Service Selection: Entrepreneurial Opportunity Search and Identification; Sources of Information; Criteria to Select a Product; Conducting Feasibility Studies; Marketing Feasibility, Technical Feasibility, Finance Feasibility, HR Feasibility etc; Business Plan Formulation; Format of Business Plan with Practical example; Project Report Preparation; Specimen of Project Report. Project Planning and Scheduling using Networking Techniques of PERT/CPM.

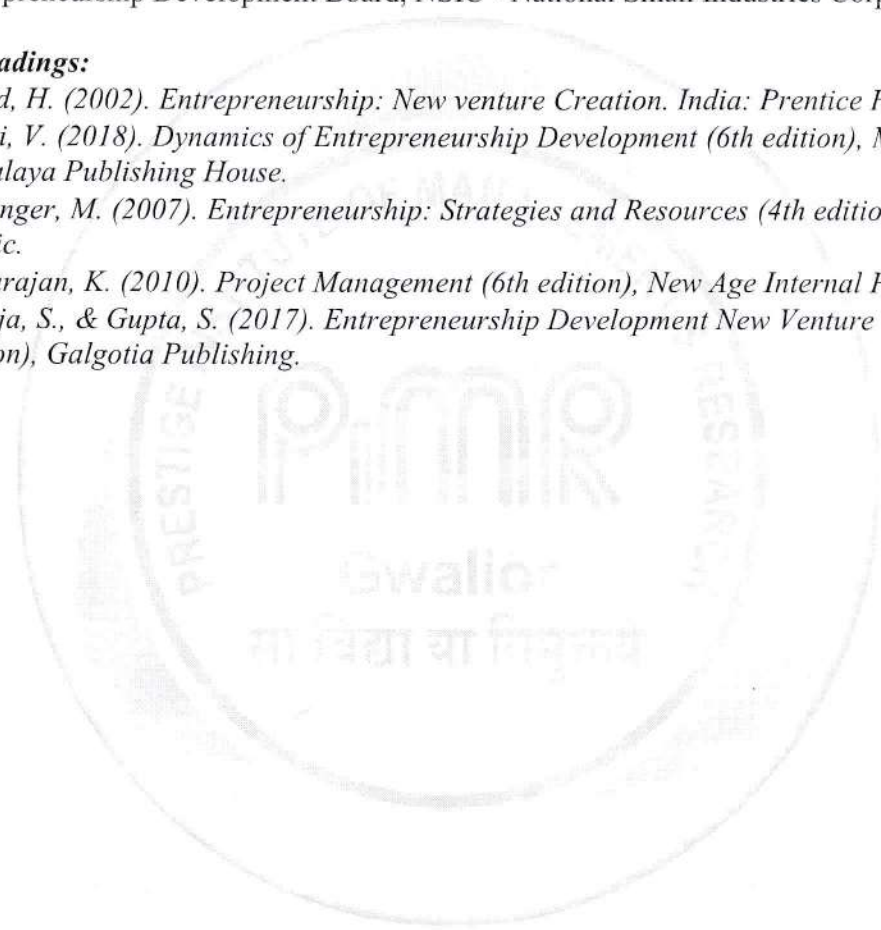

Travina
Gov

Unit 4: Entrepreneurship Training and Development Program, EDP & its Phases, Start-up Process: Development of Support System, Need of License, Capital Issues and Legal Environment of Business; Entrepreneurial Planning and Monitoring. Financial Schemes Offered by Various Financial Institutions Like Commercial Banks, IDBI, ICICI, SIDBI, SFCs, Venture Capital Funding, Angel Capitalist, Subsidies, Grants etc.

Unit 5: Role of the following Agencies in the Entrepreneurship Development DIC- District Industrial Center, SISI – Small Industry Service Institute, EDII – Entrepreneurship Development Institute of India, NIESBUD – National Institute of Entrepreneurship and Small Business Development, NSTEDB – National Science & Technology Entrepreneurship Development Board, NSIC - National Small Industries Corporation

MBA_BA IV SEMESTER CYBER SECURITY & LAW PAPER CODE: MBA-BA –402	Max. Marks: 100 Min. Marks: 35 External :60Internal: 40
------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------

CYBER SECURITY & LAW

Course Outcomes: At the completion of the course, students would be able to:

- CO1a: Identify and resolve security issues in networks and computer systems to secure any public or private organization
- CO1b: Understand the concept of Cyberspace and Regulation of cyberspace
- CO2: Apply the branches of law, jurisdictional boundaries and cybersecurity law enforcement.
- CO3: Analyze the concept and impact of E-commerce on business models and strategy
- CO4: Recommend a legal defence against data breaches or cybercrime civil or criminal proceedings

CO/PO MATRIX					
Course Outcomes	PO1	PO2	PO3	PO4	PO5
CO1a	3	3	2	2	2
CO1b	2	3	1	2	3
CO2	2	1	1	3	2
CO3	2	2	2	3	3
CO4	2	1	2	3	2

Unit 1: Computers and Cyber Security

Introduction to Computers, Classification, Computer Input-Output Devices, Computer Security Terms, Computer Ethics, Business and Professional Ethics, Need for cyber security; Cyber Frauds and crimes, Digital Payments, Various Search Engines.

Unit 2: Cyberspace

Introduction to Cyberspace, Regulation of cyber space – introducing cyber law, Scope of Cyber laws – e-commerce; online contracts, IPRs (copyright, trademarks and software patenting); e-taxation, e-governance and cyber crimes, Human rights in cyberspace, International Co-operation in investigating cybercrimes, Challenges to Fighting Cybercrime.

Unit 3: Cyber Laws

Need for Cyber Rules & Regulations; Scope and Significance of Cyber laws: Information Technology Act 2000; Amendments in IT Act, Network and Network Security, Access and Unauthorized Access, Data Security, E Contracts and E Forms. Penal Provisions for Phishing, Spam, Virus, Worms, Malware, Hacking, Trespass and Stalking

Unit 4: E- Commerce

Definition of E-commerce, Introduction to E-Commerce-UNCITRAL, Types of E-commerce, Important Issues in Global E-commerce, Electronic signatures – technical issues and legal issues, Electronic Contracts – E-Commerce Trends and Prospects, E-commerce and Taxation, E-commerce and Banking – Online Credit Card Payments, E-commerce and Retailing – E-Commerce and Corporate finance.

MBA_BA III SEMESTER SOCIAL MEDIA & WEB ANALYTICS PAPER CODE: DSEC-01	Max. Marks: 100 Min. Marks: 35 External :60 Internal: 40
-----------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------

SOCIAL MEDIA AND WEB ANALYTICS

Learning Objectives: The aim of this course is to showcase the opportunities that exist today to leverage the power of the Web and social media and to equip students with skills to collect, analyze and derive actionable insights from web clickstream, social media chatter, usability testing and experiments. A key feature of this course is the use of hands-on software tools for analyzing web and social media interactions.

Course Outcome

- CO1a: Understand the role of web analytics within the digital marketing landscape
- CO1b: Identify, define and interpret commonly used web metrics and KPIs
- CO2: Understand analytical methods to transform social media data into marketing insights
- CO3: Understand how to effectively use insights to support website design decisions, campaign optimization, search analytics
- CO4: Analyse unstructured data such as Social Media comments, customer reviews to understand the sentiments of the customers.

CO-PO Matrix					
Course Outcomes	PO1	PO2	PO3	PO4	PO5
CO1a	2	2	1	2	3
CO1b	2	2	2	2	2
CO2	2	2	2	2	2
CO3	1	2	2	2	2
CO4	1	1	1	1	1

Unit 1 : Social Media & Analytics: Introduction to Social Media, Social Media Landscape, Social Media Analytics & its Need. SMA in Small and Large Organisations; Application of SMA in Different Social Media Platforms.

Introduction to Web Analytics: Definition, Process, Key Terms: Site References, Keywords and Key Phrases; Building Block Terms: Visit Characterization Terms, Content Characterization Terms, Conversion Metrics; Categories: Offsite Web, on Site Web; Web Analytics Platform, Web Analytics Evolution, Need of Web Analytics, Advantages & Limitations.

Unit 2 : Network Fundamentals: The Social Networks Perspective - Nodes, Ties and Influencers, Social Network, Web Data and Methods.

Data Collection and Web Analytics Fundamentals: Capturing Data: Web Logs, Web Beacons, Java Script Tags, Packet Sniffing; Outcome Data: E-commerce, Lead Generation, Brand/ Advocacy and Support; Competitive Data: Panel Based Measurement, ISP Based Measurement, Search Engine Data;

Signature
Law

Organizational Structure. Type and Size of Data, Identifying Unique page Definition, Cookies, Link Coding Issues.

Unit 3 : Web Metrics & Analytics: Common Metrics: Hits, Page Views, Visits, Unique Page Views, Bounce, Bounce Rate & its Improvement, Average Time on Site, Real Time Report, Traffic Source Report, Custom Campaigns, Content Report, Google Analytics; Key Performance Indicator: Need, Characteristics, Perspective and Uses.

Graphs and Matrices- Basic Measures for Individuals and Networks. Random Graphs & Network Evolution, Social Context: Affiliation & Identity

Web analytics Tools: A/B testing, Online Surveys, Web Crawling and Indexing, Natural Language Processing Techniques for Micro-Text Analysis

Unit 4 : Facebook Analytics: Introduction, Parameters, Demographics. Analyzing Page Audience: Reach and Engagement Analysis. Post-Performance on FB; Social Campaigns: Goals and Evaluating Outcomes, Measuring and Analyzing Social Campaigns, Social Network Analysis Like Instagram, Twitter, LinkedIn, YouTube etc. AdWords, Benchmarking, Categories of Traffic: Organic Traffic, Paid Traffic;

Google Analytics: Brief Introduction and Working, Google Website Optimizer, Implementation Technology, Limitations, Performance Concerns, Privacy Issues.

Unit 5

Practical: Students should analyze the social media of any ongoing campaigns and present the findings.

MBA_BA IV SEMESTER MARKETING ANALYTICS PAPER CODE: DSEC-02	Max. Marks: 100 Min. Marks: 35 External :60 Internal: 40
---------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------

ELECTIVE - MARKETING ANALYTICS

Course Objectives

This course will provide students with an introduction to marketing analytics.

The students will learn various tools for generating marketing insights from data in such areas as segmentation, targeting and positioning, satisfaction management, customer lifetime analysis, customer choice, product and price decisions using conjoint analysis, and text analysis and search analytics.

Course Outcomes:

CO1a: Understand various marketing models and metrics

CO1b: Demonstrate Competitive analysis

CO2: Explain Price analytics

CO3: Understand Promotion analytics

CO4: Understand Sales analytics

CO/PO Matrix					
Course Outcomes	PO1	PO2	PO3	PO4	PO5
CO1a	2	3	1	2	-
CO1b	3	3	3	2	1
CO2	3	3	3	2	1
CO3	3	3	2	3	1
CO4	2	3	2	2	2

Unit 1: Introduction to marketing analytics, models and metrics, Market Insight: Market terminology, market data sources, market sizing, pestle market analysis, porter five forces analysis. Market segmentation: creating segments using cluster analysis.

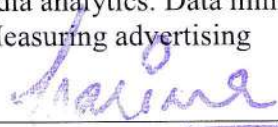

Unit 2: Competitive Analysis: Competitive information, analysis and action process. Product and Service Analytics: Conjoint analysis, decision tree models, portfolio resource allocation, product and service metrics, attribute preference testing.

Unit 3: Price analytics: pricing techniques and assessments, profitable pricing, pricing for business markets, price discrimination. Distribution Analytics: Distribution channel characteristics, retail location selection, channel evaluation and selection, multi-channel distribution, distribution channel metrics.

Unit 4: Promotion Analytics: Promotion budget estimation, promotion budget allocation, promotion metrics for traditional and social media. Social media analytics. Data mining. Online Advertising, Pay Per Click (PPC), Google AdSense. Measuring advertising effectiveness.

MBA_BA III SEMESTER FINANCIAL ANALYTICS PAPER CODE: DSEC-03	Max. Marks: 100 Min. Marks: 35 External :60 Internal: 40
-------------------------------------------------------------------	-------------------------------------------------------------------

MBA(BA) 303: FINANCIAL ANALYTICS

Learning Objectives

The Objective of the course is to facilitate students to appreciate empirical issues and help identify research questions in the finance areas discussed along with the analytical tools for financial decision making.

Course Outcomes: After Completion of the course, student will be:

- CO1a: Understand the concept, need of Financial Analytics and time value of money.
- CO1b: Possessing knowledge of Financial Market Structures, Asset pricing theories and the optimal portfolio
- CO2: Applying Volatility and Risk Model for forecasting
- CO3: Analysing Risk Measurement technique for financial Institution.
- CO4: Estimate derivative price and interoperating different issues in International Finance.

DSEC-03 Financial Analytics					
Course Outcomes	PO1	PO2	PO3	PO4	PO5
CO1a	3	2	–	2	–
CO1b	3	3	3	–	2
CO2	3	3	2	–	–
CO3	3	–	–	2	2
CO4	3	3	2	3	2

Unit 1: Introduction to Financial Analytics: Definition, relevance and scope financial Analytics, recent trends in financial analytics
Financial Time Series and Their Characteristics: Asset Returns, Distributional Properties of Returns, Review of Statistical Distributions and properties of financial time Series.

Unit 2: Financial Market, Microstructure Issues (of Bond & Stock Market), Liquidity in Short term and Long term market segments.
Asset Portfolio Models: Basics of portfolio construction, Markowitz Theorem, Capital Asset Pricing Model, Diversification and Portfolio Optimization

Unit 3: Modeling Volatility and Risk: Characteristics of volatility. Modeling volatility using ARCH/GARCH models. Volatility Estimation in Financial Market Turbulence, Measuring and modeling risk. Application of Value at Risk (VaR)

Unit 4: Risk Measurement in Financial Institutions, Measuring Market and Credit Risks, Modeling Credit Risk: Corporate Liabilities as contingent claims, Endogenous default boundaries and optional Capital Structure, Intensity Modeling, Rating based term-structure models,

Unit 5: Derivative Pricing: Issues regarding derivative markets. Brownian motion, Black -Sholes model. Modeling derivative prices
Empirical issues in International Finance, International Arbitrage and Parity Conditions, Yen Carry Trade and Interest Rate Parity, International Investment Issues.

MBA_BA IV SEMESTER HR ANALYTICS PAPER CODE: DSEC-04	Max. Marks: 100 Min. Marks: 35 External :60 Internal: 40
-----------------------------------------------------------	-------------------------------------------------------------------

HR ANALYTICS**Credit-04**

Course Objectives: Course will cover the application part of Human Resource Management explaining the quantitative and qualitative analysis to understand the workforce demographics and the art of work force development

Course Outcomes: Through this course student will:

CO 1a: Introduces the theory, concepts, and business application of human resources data, metrics and systems.

CO 1b: Business application of human resources research, data, metrics, systems, analyses, and reporting.

CO2: Examine actual business cases and apply problem solving and critical thinking skills through group case studies

CO3: Understand the application of quantitative and qualitative analysis to understand trends and indicators in human resource data.

CO4: Apply quantitative and qualitative analysis to understand trends and indicators in human resource data.

CO/PO MATRIX					
Course Outcomes	PO1	PO2	PO3	PO4	PO5
CO1a	3	3	2	2	3
CO1b	3	3	3	3	2
CO2	3	3	3	3	2
CO3	2	3	3	3	2
CO4	2	3	3	3	2

UNIT 1: HR Analytics in Perspective

Role of Analytics, Defining HR Analytics, HR Analytics: The Third Wave for HR value creation, HR Measurement journey in tune with HR maturity journey, Understanding the organizational system (Lean) , Locating the HR challenge in the system, Valuing HR Analytics in the organizational system, Typical problems (working session)

UNIT 2 : HRA Frameworks:

Current approaches to measuring HR and reporting value from HR contributions, Strategic HR Metrics versus Benchmarking, HR Scorecards & Workforce Scorecards and how they are different from HR Analytics, HR Maturity Framework: From level 1 to level 5, HR Analytics Frameworks: (a) LAMP

framework; (b) HCM:21 Framework and (c) Talent ship Framework, 5 overarching components of an effective Analytics framework.

UNIT 3: Basics of HR Analytics:

Basics of HR Analytics, what is Analytics, Evolution, Analytical capabilities, Analytic value chain, Analytical Model, Typical application of HR analytics.

Predictive Analytics:

Steps involved in predictive analytics: Determine key performance indicator, analyse and report data, interpreting the results and predicting the future. Metrics and Regression analysis and Causation.

UNIT 4: Insight into Data Driven HRA:

Typical data sources, Typical questions faced (survey), Typical data issues, Connecting HR Analytics to business benefit (case studies), Techniques for establishing questions, Building support and interest, Obtaining data, Cleaning data (exercise), Supplementing data.

UNIT 5 : HR Metrics

Defining metrics, Demographics, data sources and requirements, Types of data, tying data sets together, Difficulties in obtaining data, ethics of measurement and evaluation. Human capital analytics continuum.

HR Dashboards : Statistical software used for HR analytics: MS-Excel, IBM- SPSS

HR Scorecard

Assessing HR Program, engagement and Turnover, Finding money in Analytics, Linking HR Data to operational performance, HR Data and stock performance. Creating HR Scorecard, develop an HR measurement system, guidelines for implementing a HR Scorecard.

MBA_BA IV SEMESTER RETAIL ANALYTICS PAPER CODE: DSEC -05	Max. Marks: 100 Min. Marks: 35 External :60 Internal: 40
-------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------

RETAIL ANALYTICS

COURSE OBJECTIVES

- CO1a: Understand the fundamentals of retail analytics and tools.
 CO1b: Use Stata and SPSS for retail advertising and web metrics.
 CO2: Understand customer insights by analysing retail data.
 CO3: Comprehend in store retail marketing analytics.
 CO4: Understand the in-store retail management and operations.

CO/PO MATRIX					
Course Outcomes	PO1	PO2	PO3	PO4	PO5
CO1a	3	3	3	2	2
CO1 _b	2	3	3	2	3
CO 2	3	3	3	2	3
CO 3	3	3	3	2	3
CO 4	3	2	2	2	2

METHODOLOGY

The methodology is predominantly by Case analysis and Computer based Problem Solving, complemented by lecture mode. The students have to undertake a project work in a topic of their interest and product, to apply the concepts studied in the course.

Unit 1: Introduction to Retail Analytics:

Overview of modern retailing marketplace and understanding technological aspects - Promotion Metrics Customer Analytics Overview; Quantifying Customer Value. Using Stata for Basic Customer Analysis. Introduction to SPSS for retail analysis.

Unit 2: Advertising/Web metrics:

Promotion Analysis - Syndicated scanner data analysis – Retail POS data analysis. Response Analysis: RFM Analysis, Logistic Regression, Neural Networks and Decision Trees. Role of Ms- Excel in Analysis.

Unit 3: Consumer Insights: with retail data –

Overall Marketing Metrics – Introduction to R/R-Studio Market Basket Analysis, Trade Area Modeling, Real Estate Site Selection Modeling; Celebrity Marketing: Tracking Effectiveness, House Brand versus Name Brand, E-Business: Clicks and Mortar, Affinity Merchandising: Merchandise Cross-Sell Case Study.

Unit 4: In-Store Marketing Analysis:

Presentation Understanding the Different Store Designs, Theories Merchandise Placement, All about Pricing, Loyalty Discount Philosophies. Types and Sizes: Retail Store Strategies, Store in a Store, What's in a Store: Convenience Stores to Hypermart Stores

Trina
gen

Paika Sikarwar

Unit 5: Store Operations:

Warehouse Clubs: Paying for the Privilege to Shop, Shopping by Design: Traffic Patterns, Category Management: Science behind the Merchandise Mix, Merchandise Placement: Strategy behind the Placement, Specialty Departments: Coffee, Breakfast, and Pizza, InStore Media: Advertising or Just Displays? Receipt Messages, In-Store Events, Holidays.

MBA_BA IV SEMESTER DATA MANAGEMENT AND ETHICS PAPER CODE: DSEC -06	Max. Marks: 100 Min. Marks: 35 External :60 Internal: 40
-----------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------

DATA MANAGEMENT AND ETHICS

Course Objective

The objective of the course is

- To provide foundational knowledge on Research Ethics.
- The objective of the course is to understand what research data, the need for managing and sharing research data and the lifecycle continuum of research data.
- The course is also designed to impart the researchers with the knowledge of responsible conduct and research ethics.

Course Outcomes:

At the end of course student will be able to:

- CO1a: Understand the significance of data management in research practice
- CO1b: Learn and understand the documentation and data Organization to improve data analysis
- CO2: Understand and analyse the research ethics and best practices used in research
- CO3: Learn to analyse data fabrication and misinterpretation
- CO4: Understand and value the need for ethical decision making while performing Research

CO/PO MATRIX					
Course Outcomes	PO1	PO2	PO3	PO4	PO5
CO1a	3	3	3	2	2
CO1b	2	3	3	2	3
CO2	3	3	3	2	3
CO3	3	3	3	2	3
CO4	3	2	2	2	2

Unit1: Introduction to Data Management

The data problem: What? Why? The data lifecycle: The data life cycle and roadmap, where to start data management? Planning for data management: How to plan for data management? Creating a data management plan, data policies.

Unit2: Documentation, Organization and Improving Data Analysis

Documentation: Research books and lab notebooks, methods, other useful documentation formats, metadata, standards. Organization: File organization, naming and documenting conventions, databases. Improving data analysis: Raw versus analysed data, preparing data for analysis, managing your research code. Managing sensitive data: Types, keeping data secure, anonymizing data.

Unit3: Research Ethics: An Introduction

Research Ethics: Best Ethical Practices, Morality vs ethics, Inauspicious beginnings, How science works. Plagiarize and Perish: Ideas, Sentences, Phrases, what is plagiarism really?

Handwritten signature

Palika Sikawan

Handwritten signature

How many consecutive identical and uncited words constitute- plagiarism? Self-plagiarism and recycling, Tools to discover plagiarism.

Unit4: Research Misconduct: Fabricating data, Falsification and Whistleblowing

Research Misconduct: Fabricating Data: Why cheat? Data fabricator, Detection of image and data misrepresentation. Research Misconduct: Falsification and Whistleblowing: A "can of worms" indeed: the case of Elizabeth "Betsy" Goodwin, Deal with ethical quandaries, Cultivating a culture of openness, integrity, and accountability.

Unit5: Authorship and Grant Proposals

Authorship: Who's an Author on a Scientific Paper and Why: The importance of the scientific publication, who should be listed as an author? How to avoid author quandaries, Authorship other than research papers, The difference between authorship and inventorship and their thoughts. Grant Proposals: Ethics and Success Intertwined: Why funding is crucial, Path to success in funding, Fair play and collaboration, Recordkeeping and fiscal responsibility, Pushing the limits on proposals.

MBA_BA III SEMESTER DIGITAL MARKETING ANALYTICS PAPER CODE: DSEC -07	Max. Marks: 100 Min. Marks: 35 External :60 Internal: 40
-----------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------

DIGITAL MARKETING ANALYTICS

Course Objectives:

The aim of the course is to aid students in understanding digital marketing methods from the viewpoint of several parties such as analysts, consumers or entrepreneurs and to inculcate the fundamental concepts of digital marketing. The course includes knowledge of various tools of the trade such as Content analytics tools, audience analysis and content analysis.

Course Outcomes: At the end of course student will be able to:

- CO1a: Understand the concept of digital media and impact of technology has on traditional marketing scenario
- CO1b: Construct content creation strategy and allocate the content analysis tools
- CO2: Extrapolate the tools of trade with analysing the various user interface.
- CO3: Analyze and optimize existing digital marketing campaigns.
- CO4: Comprehend the process of product development and Strategies the various Research Plan related to Consumer

CO1b	3	3	2	2	1
CO2	2	2	1	3	2
CO3	2	2	2	1	2
CO4	2	1	2	2	1

Unit 1: Introduction

Understanding the Digital Media Landscape: Digital Media Types, Paid & Owned Media
 Understanding Digital Analytics Concepts: Owned & Earned Social Metrics, Demystifying Web Data, Searching for the Right Metrics, Paid & Organic Searches, Aligning Digital and Traditional Analytics.

Unit 2: Content creation Strategy

Plan your content, strategy of creating content, Distribute & Promote content, Optimize Website UX & Landing Pages, Measure Impact
 Content Analysis Tools: Content Audit and its Checklist, Real-Time Analytics, Optimizing Content Distribution & Content Consumption.

Unit 3: Tools of trade

Tools: Identification, Data Capture, Spam Prevention, Integration with Other Data Sources, Cost, Mobile Capability, API Access, Consistent User Interface, Workflow Functionality, Historical Data, Understanding Social Media Engagement Software, Easy-to-Navigate User Interface, Reliability, Robust Analytics Dashboards, Mobility, CRM Hooks, Social Governance, Monitoring Platform Integration

MBA_BA III SEMESTER TIME SERIES ANALYSIS PAPER CODE: DSEC -08	Max. Marks: 100 Min. Marks: 35 External :60 Internal: 40
------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------

TIME SERIES ANALYSIS

Course Objectives

The course has been designed to acquaint the students with the set of modern analytical tools to solve practical problems in finance and bridge the gap between finance theories and practice by building operational models. The objective of this course is to provide knowledge of advanced quantitative and simulation tools to analyse financial data available on the performance of company, industry and economy, for forecasting future financial performance and to present suitable valuations.

Course Outcomes: On completion of this course the students will be able to:

- CO1a: Demonstrate the fundamentals of Time series analysis
- CO1b: Develop the understanding of the types of data and functioning of the software
- CO2: Predict the movement in time series data through various techniques
- CO3: Understanding the financial data through various multiple regression model
- CO4: Examining the asset return volatility through various Models

CO-PO Matrix					
Course Outcomes	PO1	PO2	PO3	PO4	PO5
CO1a	1		2		
CO1b	1	3	1		
CO2		3	1		1
CO3	1	3			1
CO4		3			1

Unit 1: Introduction to Time Series Analysis

Utility of the Time Series, Components of Time Series - Long term trend or secular trend - Seasonal variations - Cyclic variations - Random variations. Methods of Measuring Trend - Free hand or graphic method.

Unit 2: Introduction of Software and Data Types

Introduction of the Software, Introduction to financial data Analysis Using E-Views, Decision making, Uncertainty, Types of Data, Cross-section Data, Panel Data, Time series analysis, Exponential Smoothing, Classical Linear Regression Model.

Unit 3: Techniques of Financial Data Analysis and Forecasting

Auto Correlation Function, Partial Auto-correlation Function, Correlogram, Stationary and Non stationary Time series, Test of Stationarity, Auto Regressive, Moving Average, ARMA models of Stationary Time Series ARIMA (p, d, q) models for analysis and forecasting of financial data, Diagnostic checking, Q and LB Statistic, Box Jenkins Methodology for ARIMA models.

Harina
Har

*Tarika Sikarwar*⁷⁴

Unit 4: Multiple Regression Models

Multiple Regression models for financial data, Multiple Regression models for financial data, Co-integration, Vector Auto regression, Vector Error Correction Model, Logit and Probit models.

Unit 5: Modelling Asset Return Volatility

Modelling asset return volatility, ARCH, GARCH and EGARCH models for estimating asset price volatility and volatility forecasting (Using MS-Excel and E-Views)

MBA_BA III SEMESTER CONSUMER BEHAVIOUR PAPER CODE: MK-01	Max. Marks: 100 Min. Marks: 35 External :60 Internal: 40
----------------------------------------------------------------	-------------------------------------------------------------------

MBA MK 01 - CONSUMER BEHAVIOUR

Course Objective

To understand the role of consumer behaviour in marketing and to identify qualitative and quantitative methods of measuring consumer behavior

Course Outcomes: On the completion of the course, the student will be able to:

- CO1a: Understand the application and methods of consumer research
- CO1b: Acquire the knowledge of individual determinants of consumer behaviour
- CO2: Understand the facets of group dynamics with reference to consumer behaviour
- CO3: Comprehend the communication and consumer decision-making process.
- CO4: Describe various models of consumer behaviour and application of CB in industrial

CO-PO Matrix

Course Outcomes	PO1	PO2	PO3	PO4	PO5
CO1a	3	2	3	3	2
CO1b	3	3	2	3	3
CO2	3	2	3	3	3
CO3	3	3	3	3	3
CO4	3	2	3	3	3

Unit 1: Introduction to Consumer Behavior: Nature and Importance of CB, Application of CB in Marketing Consumer Research Process: Various Methods and techniques of consumers' research, Consumer Research Process, New developments in the field of consumer research.

Unit 2: Individual Determinants of CB: Motivation: needs/motives & goals, dynamic; Perception: Elements of Perception, Dynamics of Perception, Consumer Imagery, Learning: principles, theories, Personality: Theories, Personality and understanding Consumer Diversity, Brand Personality, self and Self Image, Attitude: Structural model of attitude.

Unit 3: Group Determinants of CB: Reference group influence: types of consumer relevant groups, factors affecting group influence, application of reference group concept. Family: Functions of family, family decision making, family life cycle (FLC), Opinion Leadership and Personal influence, Diffusion of Innovation: Adoption process. Diffusion process.

Unit 4: Communication and Persuasion: Communication – Components and Process, Designing Persuasive Communication

Signature
Gen

Consumer Decision Making Process:- Problem recognition, Information Search and Evaluation, Outlet Selection and Purchase Post purchase behavior.

Unit 5: Models of CB:

Traditional Models of Consumer Behavior: Economic, Social and Psychological
Contemporary Models of Consumer Behavior Nicosia, Howard & Sheth, Engel-Kollat-Blackwell, Input Process Output Model

Industrial Market & and Consumer Behavior-Meaning, scope and characteristics of industrial buyer, Factors affecting industrial buying, Participants in Industrial Buying, Industrial buying process.

MBA_BA III SEMESTER SALES AND DISTRIBUTION MANAGEMENT PAPER CODE: GE-02	Max. Marks: 100 Min. Marks: 35 External :60 Internal: 40
--------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------

SALES AND DISTRIBUTION MANAGEMENT

Course Objective

The objective of the course is to provide an understanding of the concepts, attitudes, techniques and approaches required for effective decision making in the areas of Sales and Distribution, the understanding of the practising manager's problems and dilemmas and to develop the skills critical for generating, evaluating and selecting sales and distribution strategies.

COURSE OUTCOMES

Course Outcomes: On completion of the course the student will be able to:

- CO1a: Understand the concepts of sales management
- CO1b: Discuss the various theories of sales management, organizing, staffing, training and directing sales force operations
- CO2: Evaluating and controlling the sales effort and understanding various sales promotion strategies
- CO3: Describe the aspects and importance of marketing channel management
- CO4: Discuss the approaches and practical aspects of distribution system

CO-PO Matrix					
Course Outcomes	PO1	PO2	PO3	PO4	PO5
CO1a	2	-	3	3	2
CO1b					
CO2	2	1	3	2	2
CO3	1	-	3	2	2
CO4	-	-	2	2	2

Unit 1: Introduction of Sales Management:

Meaning and Objectives of Sales Management, Role of Sales Management in marketing, personal selling process and salesmanship, hard sales vs soft sales, setting personal selling objectives and strategies, determining sales-related marketing policies, Techniques of sales forecasting.

Unit 2: Theory of sales Management:

AIDAS theory, 'Right Set of Circumstances' Theory, Buying Formula Theory, Behavioral Equation Theory, Buyer-Seller Dyads, Importance of sales quotas and sales territories.

Organizing, Staffing and Training sales force: Sales organization structures, recruiting and selecting sales people, planning, executing and evaluating sales training programs.

Directing Sales Force Operations: motivating sales personnel, compensating sales people.

MBA_BA III SEMESTER HUMAN RESOURCE DEVELOPMENT & ORGANIZATIONAL DEVELOPMENT PAPER CODE: GE-03	Max. Marks: 100 Min. Marks: 35 External :60 Internal: 40
------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------

Course Objective

The course highlights the interventions of HRD & OD and its application.

Course Outcomes: After completion of course the students will be able to:

- CO1a: Understand the concept of HRD, HRD Interventions, OD and OD interventions.
- CO1b: Design training & development program.
- CO2: Develop career development plans and performance appraisal systems in the organization.
- CO3: Conduct HRD audit.
- CO4: Plan & implement HRD & organizational development interventions.

CO/PO MATRIX					
Course Outcomes	PO1	PO2	PO3	PO4	PO5
CO1a	3	3	2	2	3
CO1b	3	3	3	3	2
CO2	3	3	3	2	2
CO3	2	3	3	3	2
CO4	2	2	2	2	2

Unit 1: HRD:

Concept, Goals, Importance; History of HRD in India; HRD Interventions; Qualities of HRD Professionals; Present Status of HRD in India.

Unit 2: Training Human Resource:

Nature of Training, Training Need Assessment, Training Design, Training Delivery, Training Evaluation.

Talent Management and Development: Careers and Career Planning, Specific Individual Career Issues, HR Development Approaches: The Integrative Framework, Human Capital Appraisal Approach, HRD Score Card Approach, PCMM Approach

Unit 3: Performance Management System:

Identifying and Measuring Employee Performance; Performance Appraisal; Tools for Measuring Performance Appraisal: MBO, Psychological Appraisal, Assessment Centre, 360-degree & 720-degree Feedback; Potential Appraisal; Competency Mapping and Competency Mapping Model

MBA_BA IV SEMESTER SECURITIES ANALYSIS AND PORTFOLIO MANAGEMENT PAPER CODE: GE-04	Max. Marks: 100 Min. Marks: 35 External :60 Internal: 40
------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------

SECURITIES ANALYSIS AND PORTFOLIO MANAGEMENT

Course Outcomes: Upon completion of this course, students will be able to:

- CO1a: Understand the basics of Capital Market
- CO1b: Analyze the risk and return of Securities
- CO2: Apply the Fundamental and Technical Indicators to predict Stock Market trends
- CO3: Demonstrate the Modern Portfolio Management and its application in portfolio selection
- CO4: Assess portfolio revision technique and portfolio performance

CO/PO MATRIX					
Course Outcomes	PO1	PO2	PO3	PO4	PO5
CO1a	1	2	-	1	-
CO1b	2	2	2	1	2
CO2	2	3	3	3	3
CO3	3	2	3	1	1
CO4	2	1	2	1	2

Unit 1: Investment: Meaning, Investment vs. Speculation:

Characteristics of Investment; Investment Process; Securities Market; Issue of Securities; Initial Public Offer (IPO); Right Issue; Bonus Issue; Private Placement; Listing; Trading; Settlement

Unit 2: Valuation of Securities:

Basic Concepts: Return, Risk, Intrinsic Value; Problem of Return & Risk; Expected Return, Components of Risk; Measurement of Risk, Variance, Standard Deviation, Security Beta; Calculating & Interpreting Beta, Valuation of Fixed Income Securities; Debentures and Bonds; Current Yield; Yield To Maturity (YTM); Yield to Call (YTC); Bond Duration Valuation of Equity; Constant Rupee Dividend Model; Constant Growth Model; Multiple Growth Model; Price Earnings (P/E) Approach.

Unit 3: Approaches to Security Analysis: Fundamental Analysis:

Economy, Industry and Company Analysis;
Technical Analysis: Dow Theory; Elliot Wave; Moving average, Exponential Average; Oscillators; Rate of Change (ROC); Relative Strength Index (RSI); Moving Average Convergence Divergence (MACD); Breadth of the Market;

Unit 4: Portfolio Analysis and Selection:

Portfolio Return and Portfolio Risk; Modern Portfolio Theory; Markowitz Theory; William Sharpe's Single Index Model; Capital Asset Pricing Model (CAPM); Arbitrage Pricing Theory (APT); Efficient Market Hypothesis (EMH); Security Market Line (SML) & Capital Asset Pricing Model (CAPM); Estimate CAPM beta; Using the CAPM to Calculate

 Tarika Sikarwar

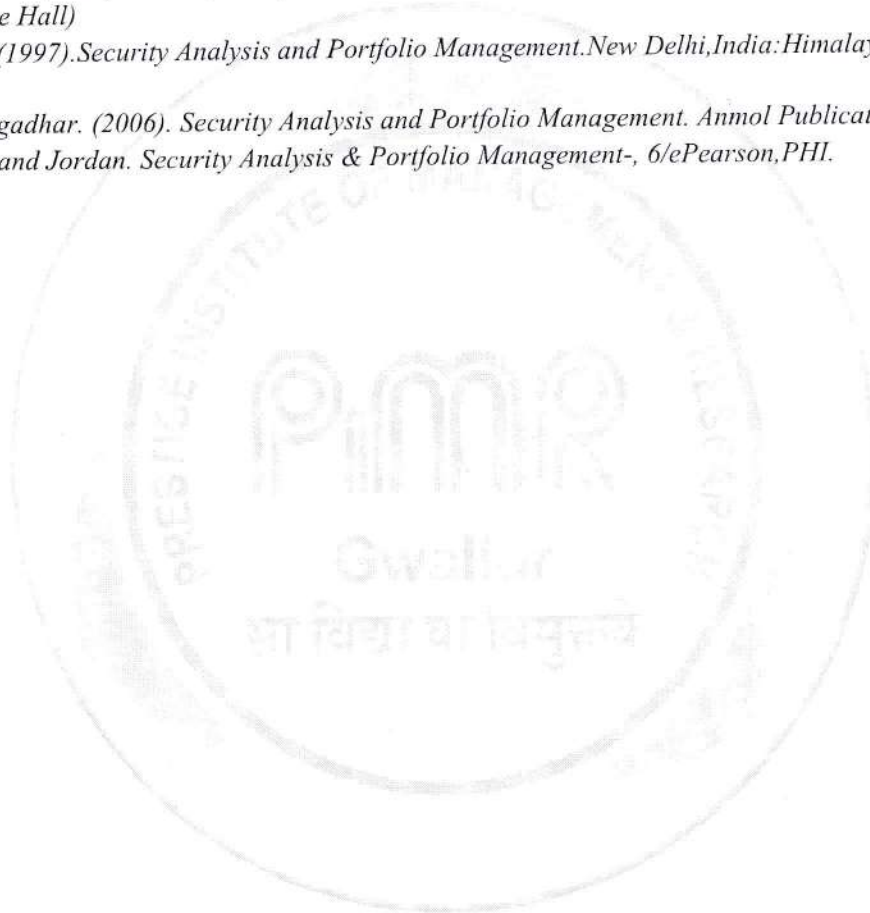

The Portfolio Return

Unit 5: Portfolio Evaluation & Revision:

Concept of Portfolio Evaluation, Steps & Methods of Portfolio Evaluation: Sharpe's, Treynor's and Jensen's Measures of Portfolio Performance Evaluation;
Portfolio Revision: Concept, Need, Constraints, Revised Techniques

MBA_BA IV SEMESTER FINANCIAL ECONOMETRICS PAPER CODE: GE-05	Max. Marks: 100 Min. Marks: 35 External :60 Internal: 40
----------------------------------------------------------------------------	-----------------------------------------------------------------------------

FINANCIAL ECONOMETRICS

Course Objective

The course aims to provide students with the basic framework of Financial Econometrics.

Course Outcomes: In particular, it will benefit students in:

- CO1a: Understand the concept of financial econometrics, econometric Models and their estimation
- CO1b: Understand the concept of time series & implement various techniques for testing trends and unit root
- CO2: Comprehend the concept of regression analysis & identify various models of regression and appraise the use of these models.
- CO3: understand the concept and assumptions of multiple regression and further interpret various multiple regression models
- CO4: Demonstrate the concepts of validation of regression models and forecasting techniques and further learn to develop research report.

CO-PO Matrix					
Course Outcomes	PO1	PO2	PO3	PO4	PO5
CO1a	3	2	2	–	–
CO1b					
CO2	3	3	3	1	–
CO3	3	3	–	1	–
CO4	2	–	2	3	–

Unit 1: Introduction of Financial Econometrics

Meaning of Econometrics, Econometrics as a separate Discipline; Methodology of Econometrics, Types of Econometrics, specification of Mathematical Model, Estimation of Econometrical Model, Economic Data Types

Sources of Economic Data: Links to Economic Data on the Internet, Interpreting Economic Data, Obtaining the Data

Unit2: Time series Econometrics: Some basic concepts

Testing for Trends and Unit Roots: Stochastic Processes, Unit Root Stochastic Processes, Trend Stationary and Difference Stationary Stochastic Processes, Integrated Stochastic Processes, The Unit Root Test (Dickey Fuller Test, Augmented Dickey Fuller test and Phillips- Perron Test)

Unit3: Single Equation Regression Models:

Estimation of Regression Model (OLS)

The Model Interpretation of Regression, The Method of Ordinary Least Squares, The Classical Linear Regression Model: The Assumption Underline, The Method of Least Squares, Standard Errors of Least Squares Estimates, The Coefficient of Determination r^2 : A Measure of Goodness of Fit

Unit4: Multiple Regression Analysis and validation of model assumptions

The Three- Variable Model: Notation and Assumptions, Interpretations of Multiple Regression Equation, The Meaning of Partial Regression Coefficients, OLS and ML Estimation of the Partial Regression Coefficients, The Multiple Coefficients of Determination R^2 and the Multiple Coefficients of Correlation R , R^2 and Adjusted R^2

Unit5: ***Validation of Regression Model Assumptions Test***

Multi-collinearity, Heteroscedasticity, Auto correlation, Residual normality test

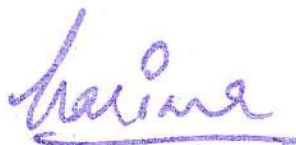

Time Series Econometrics: Forecasting

Approaches to Economic Forecasting, AR, MA and ARIMA Modeling of Time Series Data, Forecasting.

The Research Process: Writing a Research Proposal, A Process for writing a Research Report

Suggested Readings:

MBA_BA IV SEMESTER COMPENSATION PLANNING PAPER CODE: GE-06	Max. Marks: 100 Min. Marks: 35 External :60 Internal: 40
---------------------------------------------------------------------------	-----------------------------------------------------------------------------

COMPENSATION PLANNING

Course Objective

This course will examine the strategic use of compensation systems by management to attract, motivate, retain, and reward employee performance. This course will explore the factors of job evaluation as the basis of compensation strategy offering students an opportunity to develop competencies in making equitable compensation decisions.

Course Outcomes: After the completion of the course, the students will be able to:

CO1a: Summarize the concept & components of compensation.

CO1b: Understand wage determination and administration

CO2: Design compensation structure.

CO3: Analyse the types of benefits available for employees.

CO4: Discuss the challenges of employee compensation.

CO/PO MATRIX					
Course Outcomes	PO1	PO2	PO3	PO4	PO5
CO1a	2	-	2	3	2
CO1b	3	2	2	1	2
CO2	3	3	3	2	2
CO3	3	3	2	2	3
CO4	3	-	3	2	2

Unit 1: Introduction to Compensation Management:

Concept of Compensation, Factor affecting Employee Compensation, Understanding Elements of compensation structure- Indian Practices, Dimensions; Concept of Reward, Financial and Non-Financial compensation system, Concept of Total Reward System , The 3-P compensation concept.

Unit 2: Employee Behavior and Wages and Salary Administration:

Compensation strategy with HR strategy and business strategy, Wage Boards, Economic and Social objectives of wage policy, Concept of Wages and its types, Wage Differentials. Pay Commissions, Concept of Internal equity, External parity.

Unit 3: Designing Compensation System:

Process of Wage Fixation- Job Analysis, Job Evaluation-Methods Job Pricing, Designing pay ranges and bands, Methods of Payment, Salary Progression, The Total Pay Model.

MBA_BA IV SEMESTER PROJECT APPRAISAL AND FINANCE PAPER CODE: GE-10	Max. Marks: 100 Min. Marks: 35 External :60 Internal: 40
-----------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------

PROJECT APPRAISAL AND FINANCE

Course Objective

The course explains the concepts of Project Management from planning to execution of projects, the feasibility analysis and network analysis tools for cost and time estimation, comprehending the fundamentals of Contract Administration, Costing and Budgeting, and enabling the students to analyze, apply and appreciate contemporary project management tools and methodologies.

Course Outcomes: After completion of successful course student will be:

CO1a: Understand the basic concepts of project management and its application

CO1b: Appraise the project on the market and technical aspects

CO2: Evaluate the project based on capital budgeting techniques

CO3: Acquaint about the social cost benefit analysis

CO4: Estimate the cost of project and identify various sources of finance . Appraising the project on various parameters

Subject Code - MBA BA GE 10 , Subject Name - Project Appraisal and Finance					
Course Outcomes	PO1	PO2	PO3	PO4	PO5
CO1a	3	2	2	2	1
CO1b
